Pressure Booster System

The pressure booster system is a life-style product best suited for water supply for shower panels, garden, sprinklers and multi storied bungalows. It is perfect for use in homes, clubs, hotels, hospitals etc. “**IDONEO Pressure Booster Products**” gives the user the pleasure of sharp, tingling jets of water while using the shower panel. Makes gardening very convenient as it is able to supply high pressure needed for sprinkler system. Also very useful for water supply connection to multiply bathrooms such as in hotels, bungalows where water supply is needed at a constant pressure.

The Complete Water Solutions

A detailed illustration of a water pump system. It features a large, horizontal, cylindrical pressure tank with two feet at the bottom. Mounted on top of the tank is a motor with a cooling fan and a pump head. A clear plastic hose is connected to the pump head and curves upwards and to the left. The entire unit is rendered in a light, semi-transparent style.
